TEA AND COFFEE.

PROMISING ENTERPRISE OF A NORTH KONA COMPANY.

Graphic Description of the Industry.

Notes and Comments on the Kona District.

Anyone visiting North Kona should | June 29th, we quote: "Receipts are have a look at the estate of the Ha- larger this week than anticipated and guage, arithmetic, physiology and waiian Coffee and Tea Company. It | necessitate an increase in our crop esis now so advanced that it will well timates, which we now return to 800,repay examination.

The enterprise was commenced in very best of information, at this early 1891 under the managership of Mr. stage of the crop, is of a most bril-Charles Miller, with Mr. W. Waite as | liant prospect. The Spring season, head luna. Both gentlemen have had with abundant rains, set in earlier by words in various moods and tenses, over a decade's experience of both a month and a half this year comcoffee and tea culture in Ceylon, and pared with last two years, and the the latter thoroughly understands the general appearance of the cane fields manipulation of the tea-leaf after it is most promising. Increased planthas been plucked.

There are now 120 acres of coffee planted. The main portion is on the Kahaluu estate, while sections have been planted on various parts of Ho- year by hurricanes, a crop around lualoa to test the varieties of soil. On Holualoa are also five acres of tea.

To reach the plantation, the traveler has to land at Kailua and take the rope higher and cable advices say that not find room inside. Some voices new Government road, from thence to the market there had been affected by were remarkable for the clear enunthe main road through the woods. En re-purchases by Austrian factories and ciation and variety of tone and passant, it may be said that the new road has ceased to be such in its upper stock to America. Also, that crops expression. part, and has degenerated into an un- are suffering from drought. pleasant swamp, through which a buyers in the New York market horse or a mule can kick its way, but have offered 43c. for centrifugals, but in which I saw a wagon firmly imbedded. How long it would remain asking higher prices. Possibly one or

there when I returned. main road a patch of a couple of acres or so of cultivated coffee trees can be seen. The trees stand 6 feet apart in perfect alignment, and look extremely healthy. They were planted from stumps two years ago, and are now, on an average, 3 feet high. The primaries spread out finely, beginning close to the ground. Many of the trees have berries on them-an extraordinary at same date last year. Affoat to the thing for trees of two years' growth. The ground below the trees is kept carefully weeded and clean. One has only to look at the surrounding jungle of guava, high grass, kukui trees and under-brush to see what hard work the clearing of the land must have been. It shows, however, every prospeet of a good return next year, and every succeeding year it will be better, while the cost of weeding will be reduced one-half after the fourth year. But this is only an experimental bitthe main plantation is further on.

Leaving the main road and ascending the mountain to a height of 1700 feet, the plantation proper is reached. It is a mile from the main road as the crow flies, but the private road winds upwards at an easy grade for wagons, upwards at an easy grade for wagons, and covers about a mile and a haif. It is proposed to continue this road down to the beach, reducing the distance to shipping point from seven and a half to three and a half miles. But this is

a hope of the future.

The first part of the plantation I was G. Irwin @ 31 net, which figure we taken over had its trees planted in the quote. a-a. No one who is unacquainted with this formation could believe that any vegetation could flourish on it, but the fallen trunks of the giants of the forest, which have been cut down to make way for the profitable berry, attest to its fertility. Naught meets the eye but a bed of stones, out of which peep flourishing coffee plants. The keeping of such land clean is comparatively cheap. Further up, at a height of say 2000 teet, are five acres of tea. The plants are over four feet high, and will soon be ready for topping. A little to the south there are several acres of coffee in very disintegrated a-a, and still further south on the Kahulu land are over 100 acres on a fine sweep of mountain side. The soil is black and rich, somewhat of the character of that at Mr. Rycroft's plantation in Puna. In every case the land has been thoroughly cleared, and the coffee trees show out beautifully in long even lines.

Returning I went over the nursery. Here are a vast number of plants and stumps ready for setting out. The tea plants, of which there are three varieties, are wonderfully luxuriant. The question of the quality of tea remains to be settled, but the fact that tea will grow luxuriantly in this district is indisputable. The Japanese say that this tea never attained such a growth in eighteen months as is shown by the same variety at Holualoa. It seems very probable that tea in time will be-come one of the staples of the highlands of Hawaii.

The amount of clearing now being carried on shows that the company are really in earnest, and that a couple of years from now there will be many hundred acres under proper

The so-called coffee plantation of Kona, in former years, was never a served for private discussion, with real plantation but a haphazard affair. That it did fairly well was due entirely to the soil and climatic conditions. Some one or some bird drop-

ped a berry and Kona climate "did The only coffee plantation on the islands that can, at present, be put in course for a time, and see how that being serviceable and well-found, comparison with the H. C. & T. Co's. | will work. is that of Mr. Rycroft at Pohoiki in Puna. The elevation is lower than that of the H. C. & T. Co., and it has been under cultivation somewhat ade her real or fancy shortcomings aged."—Australian paper. longer. When I saw it last November I was very much struck with it. The extent of it is also not so large, but it promised to be a most profit-able venture. The example of the H. C. & T. Co. is being followed and H. C. & T. Co. is being followed and another company, started with American capital, has commenced on Mr. McDougal's land. Dr. Lindley, the government the land of this metal is enormous. Various kinds of gilding consume great will appreciate it as much, as the amounts of it. It is reckoned that government physician, has also quite a piece in and Mr. M. F. Scott has made a commencement. All these

places are being properly started.
Of the two plantations in South
Kona I can say nothing, at present,
as I have not visited them recently.
The district of Kona is filling up almost from month to month with

RESULTS REACHED IN THE The H. C. & T. Co. have pioneered the way, others will follow. KAUAI INDUSTRIAL JOCHOS.

Specimens of Pupils Handiwork.

The third year of Kauai industrial school closed June 29, 1893. golden C, 54c.; D sugar, 4kc.; stand- The examinations began at 8:30 ard A, 4 c. Prices for export continue in the morning. The boys did themselves credit, and showed a careful training in geography, lanastronomy. Perhaps the most interesting examination was one in language by Mrs. Smith, in which the boys placed on the board, in good English sentences, difficult and closed with memory gems from modern poets.

The rhetorical exercises began ing of cane has taken place, and if the at 11:30, and consisted of recitaweather during July, August, September and October, continues to be being a specific along full me so favorable as heretofore, having also boys spoke in clear, full, nathe good suck not to be visited this tural voices that could be distinetly heard not only in the school room and parlor beyond, but by those on the verandas who could

The songs constituted an important part of the programme, and included trios, quartettes, a solo and choruses. These were all well sung there I cannot tell, for it was still or two cargoes are obtainable at and highly appreciated by the au-47-16c, but for a considerable quantity | dience. The favorites seemed to About a quarter of a mile below the 42c. would be required. Cuba is firm, be the trio, "A Little Farm well Tilled," and the quartette, "Let date of June 29, 88,812 tons, against the hills resound," and the chorus, 81,027 tons previous week and 153,453 "See our oars with feathered spray." A school song, with whistling chorus, called "The Malumalu Boy," was also a favorite.

The decorations were of ferns, vines and cocoanut leaves brightened about the platform by a pro-fusion of the brilliant scarlet Ponceana regia. Mottoes and flags were also tastefully arranged about the

Having now the much desired space for the proper display of my for 85 cents a pair. splendid stock of FINE GOODS, and late additions thereto, it is a pleasure to see you in and show the arrangement of the different lines, as compared to my old and cramped quarters; it is simply paradise. My stock of staple and new Goods will from now on, be found complete, and any suggestion in the way of new fads will be eagerly attended to.

As a starter on new Goods, my very fine line of Leather Purses and Card Case combinations are well worth your attention.

Leathers in all the delicate colors of dress materials, mounted in fine sterling silver in intricate designs as well as the plain; they must be appreciated by those who have always been obliged to send away for these goods. Carrying in this line the products of the leading makers of fine Leathers in the United States, it is possible for me to offer you a choice assortment from the which takes dollars to buy.

The Gentleman's full dress Card Case, seems to be the correct thing from the way they caught on-just large enough to fit the proper pocket. Another little thing on which sales are rapidly increasing, the dainty little individual Butter Spreader in sterling silver and plate, probably the best and most useful little conciet ever thought of in connection with the table service. Remaining on the table throughout ing butter, certainly more dainty and giving the other instrument a chance to be used for what it was intended. To those of refined tastes and a sense of the fitting, very little need be said in their favor. It will not be long before every table in Honolulu will be supplied with these very necessary little articles.
